Georgia Power, Plant Yates
Newnan, GA.
Saxon Group, Inc.

In the summer of 2003 National Welding began to design and build carriers and equipment to install 5 different sizes of pipe and 3 different sizes of risers in the cooling line tunnels of Plant Yates. Our efforts centered on maximizing safety and productivity while handling 8,000 lb pipe cans in tunnels that had as little as 3" of clearance on all sides. The combination of a talented crew and the proper equipment allowed us to complete our work early during each of two 35 day outages in the Fall of 2003
